- Entourage 2004 or 2008
- (POP accounts only)**
- FileMaker Pro 8 through 10

v5.2 11/2009

Plug-in Information:

Successful integration of FileMaker plug-ins requires the creation of integration scripts within your FileMaker solution. A working knowledge of FileMaker Pro, especially in the areas of scripting and calculations is necessary. If after review of our overview videos, sample scripts and documentation you find you need assistance, please contact us or fill out a Request For Quote.

FileMaker and the file folder logo are the registered trademarks of FileMaker, Inc. in the U.S. and other countries. FileMaker images are used with the permission of FileMaker, Inc.

This Macintosh plug-in is the only plug-in that provides a bidirectional data exchange between FileMaker® Pro and Microsoft Entourage® using nothing more than a few FileMaker script steps. The Entourage Manipulator plug-in can exchange data with Microsoft Entourage Address Book, Calendar, Tasks, Notes and Mail all from your FileMaker solution. By using this plug-in your users can become more efficient through the elimination of double entry. As information gets entered into your FileMaker database during the day it updates your users Entourage folder. This also allows your users the ability to synchronize with their mobile devices such as an iPhone.

Send E-Mail:

Send plain text or HTML formatted e-mails with multiple attachments from FileMaker. (click here for video)

Contacts:

Centralize your entire company's Entourage contact list by using this powerful plug-in to pull in contacts from each user's folder into your FileMaker database. Once in your database you can clean up the list so that each user can update their own Entourage Contact folders with the clean information.

e-Mail:

Use the plug-in to import and parse e-mails from Entourage into FileMaker. Once in FileMaker you can have a complete archive of all e-mail correspondence so the entire company can view communication between any customer and employee.

Shared and Public Folders:

Use the plug-in to push or pull to shared or public folders in an Exchange Environment.

Calendar Integration:

Push your FileMaker events into Entourage, allowing users to synch their FileMaker data with the mobile devices such as an iPhone.
