Updated: 5/10/12

Today's organizations have an incredible amount of capitol invested in computers and all of the things computers do. Much of it is organized and known by individual workers but is not documented or stored in a central location. This can pose a serious problem for many managers and owners when it comes time to replace an employee, budget for new hardware and software upgrades or to project future IT costs.

Having a centralized solution that is 100% customizable will assist organizations to manage their IT assets in addition to providing a documented record of them for insurance purposes in case of fire, theft, or natural disasters.

Equipment:

- Centralized location of all computer hardware and software, purchase date, cost, location, warranty, service records, etc.

Users:

- List and track all users login and system passwords.

Domain Tracking:

- Centralized location of company domain names and ftp/web site account information.
