

The Claris Platform

Create modern, custom apps.

Claris offers the ideal path to deliver modern, custom apps that have been making businesses grow for decades.

Our insight from 30+ years ago continues to define an industry: problem solvers need to create the apps that make their business better even if they don't have deep development skills.

With Claris FileMaker you can rapidly build custom apps your business needs but you can't find anywhere. Even use advanced tech that matters, like cloud, mobile, and AI.

And when your apps are connected, you save time and cut errors. So Claris Connect automates workflows between all of your apps — custom and off-the-shelf.

Plus, you're not alone. Start with thousands of customizable apps and add-ons from the industry's most supportive community. Or, if you prefer, we have 1,400 partners who would love to help build your app.

What's new

Claris FileMaker Pro 19

- ✔ **Coming soon: Add-ons** — Snap together robust apps faster than ever. Easily add more functionality to your apps like kanban boards, photo galleries, barcode generators, and more.
- ✔ **JavaScript in a web viewer** — Use readily-available JavaScript libraries or your own custom code to create modern apps. Directly embed things like maps, animated graphics, data visualization, and more.
- ✔ **Core ML support** — Run machine learning models for image classification, sentiment analysis, object detection, and more.
- ✔ **Execute Data API script step** — Requests data in JSON format from a FileMaker app hosted locally or on FileMaker Cloud or FileMaker Server.
- ✔ **macOS Dark Mode support** — FileMaker Pro displays in the appearance chosen in System Preferences.
- ✔ **macOS Drag and drop installer** — Install FileMaker Pro by dragging the application to your drive.
- ✔ **Quick Open** — Set a preference to open a specified file at start time.

Claris FileMaker Go 19

- ✔ **Core ML support** — Run machine learning models on your device for image classification, sentiment analysis, object detection, and more.
- ✔ **Support for Siri Shortcuts** — Use your voice to run automations like searching for records, updating inventory, or starting a process.
- ✔ **NFC (near field communication) tag reading** — Quickly get information on tagged merchandise, navigate to a specific item in a database, or check in at a kiosk.

Claris FileMaker Server 19

- ✔ **FileMaker Server for Linux** — Host your apps on Linux, an industry-standard OS, for high availability and reliability. Available as a developer preview.
- ✔ **Cards in FileMaker WebDirect** — Create windows that are automatically sized and placed appropriately on the main screen. Open other windows or files without having to first close the card.

Claris FileMaker Cloud 2.19

- ✔ **Create in cloud** — Create apps directly in FileMaker Cloud from FileMaker Pro with zero configuration and deployment.
