

Program Overview

This 1 to 2 week program is designed for new, aspiring developers, IT professionals, and business administrators, to obtain a thorough understanding of the full suite of Claris tools and their real-world applications.

You'll gain practical knowledge of basic FileMaker features, learn essential technical terminology, and develop a solid foundation to build simple FileMaker solutions.

What's Included:

- Exploration of the Claris product line
- FileMaker fundamental development training
- Weekly mentoring sessions with a certified FileMaker developer.
- Progress monitoring to ensure students are progressing on schedule.

Evaluation & Certification:

- Evaluated development assignment
- Exam on courses and lessons
- Claris FileMaker Pro Associate Badge
- Upon successful completion:
 - A certificate of program completion
 - An evaluation certification.
 - *If students do not pass the first time, they will have another chance to take the evaluation.*
