Productive Computing University

Complete FileMaker Training & Certification Programs

Comprehensive Claris FileMaker Development Training

Program Overview

Our 17 to 22-week program offers a structured, hands-on journey into FileMaker development. You'll gain practical skills through rigorous coursework, expert-led training, and comprehensive evaluations, ensuring you're ready for real-world development challenges.

Whether you're an individual aiming to advance your skills or a company looking to cultivate in-house FileMaker talent, our program provides the expert guidance and practical experience you need to succeed in FileMaker development.

The FileMaker Certification Exam
Successfully passing this exam means you possess comprehensive knowledge of FileMaker's capabilities and the best practices for leveraging its tools to achieve optimal outcomes.

What's Included:

- Advanced development assignments
- Gain experience with advanced scripting, database design, and deployment for robust FileMaker applications.
- Complete QuickBooks Desktop and Online integration through plugins and API.
- Weekly mentoring sessions with a certified FileMaker developer.
- Progress monitoring and counseling to ensure students are progressing on schedule.

Evaluation & Certification:

- Evaluated development assignments
- Exam on courses and lessons
- Claris FileMaker Pro Expert Badge
- Obtain proof of your depth of knowledge on the Claris Platform by passing the FM Certification Exam.
- Upon successful completion:
  - A certificate of program completion
  - An evaluation certification.
    - *If students do not pass the first time, they will have another chance to take the evaluation.*
