System Requirements:
(System requirements are subject to change without notice. Please consult the web site for the latest information.)

- Macintosh OS X 10.7 - 10.10
- FileMaker® Pro 10 through 13

This plug-in is verified compatible with FileMaker® Pro 10-13, Windows® 7/8, Macintosh 10.7-10.10 and may work with earlier versions.

Successful integration of FileMaker plug-ins requires the creation of integration scripts within your FileMaker solution. A working knowledge of FileMaker Pro, especially in the areas of scripting and calculations is necessary. If after review of our overview videos, sample scripts and documentation you find you need assistance, please contact us or fill out a Request For Quote.

FileMaker and the file folder logo are the registered trademarks of FileMaker, Inc. in the U.S. and other countries. FileMaker images are used with the permission of FileMaker, Inc.

Updated: 10/20/2014

This Mac plug-in provides a bidirectional data exchange between FileMaker Pro and Apple's Address Book/Contacts using nothing more than FileMaker script steps. The Address Book Manipulator can exchange data dynamically in a "one-to-many" format which handles group and individual contacts, multiple addresses, phone numbers and e-mails. Use of this plug-in conveniently eliminates double entry.

@ No XML:
No XML or Applescript programming required.

@ Contacts:
Create, retrieve, edit or delete any Address Book contacts in FileMaker. Push or pull contacts from Apple Address Book into FileMaker for easy contact management.

@ Groups:
Add, edit or delete groups or contacts from groups. You can also retrieve a list of names or UID values for contacts/groups.
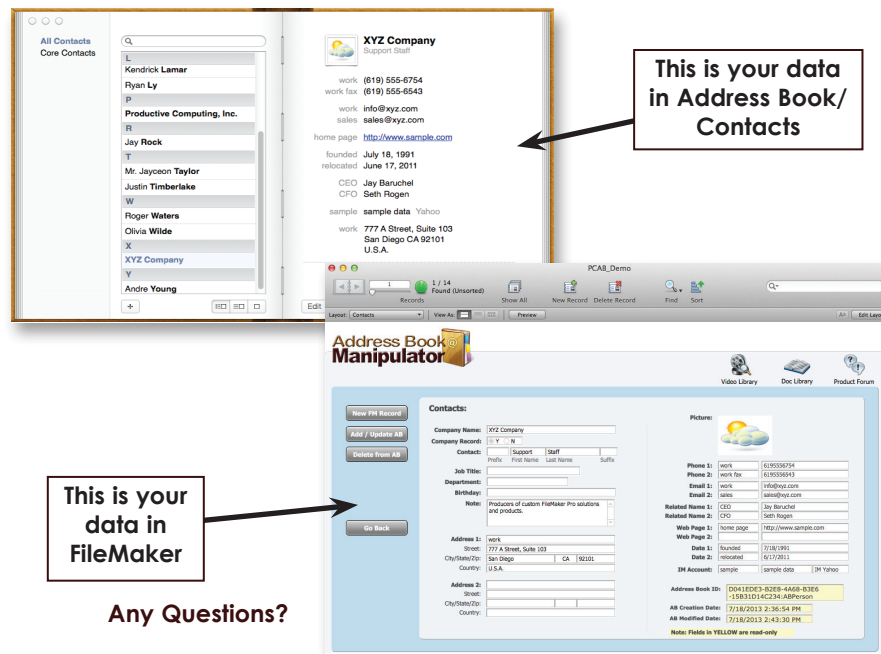

@ Access:
Set and get all text, date and number fields including labels and custom labels. Plus set and get picture field and custom fields.

@ Handheld Devices:
Use this plug-in to facilitate moving your contact information from FileMaker Pro into your iPhone via the Address Book.

This is your data in Address Book/Contacts
